We did not intend to do any injustice to the Breckenridge Company (limited), last week in what we said concerning engineer Chris Glein. We are informed that the accident to the boiler of the engine did not result from any negligence, or incompetence on his part, and that it is not an unusual occurrence for engines to break down in the same way. Mr. Ferry and the boiler maker at the machine shops, where the engine is being repaired, say that it was not the engineers' fault in any sense. Our information, we find, was misleading, and we hasten to correct our statement, and do justice to Mr. Glein, and to the company.

Proposed Settlement of the Questions At Issue By Peaceful Means.

Santiago, Chili, Jan. 25.—The Chilean Government has sent a reply to the ultimatum of the United States. The reply is in effect as follows:

Chili agrees to withdraw the offensive note sent by Senor Matta to all the Chilean Ministers abroad and acknowledges that its issuance was due to an error of judgment. Chili also withdraws its request for the withdrawal of United States Minister Egan.

In addition to this the Chilean Government, in its answer, proposes that the affair of the attack on the Baltimore's sailors in Valparaiso be submitted to the arbitration of some neutral nation.

If this proposition is not acceptable to the United States Government, the Chilean Government suggests that the matter be submitted to the decision of the Supreme Court of the United States.

Our Flower Offer.

The flower offer which accompanies the subscription to Frank Leslie's Weekly (monthly number) is a genuine one. For the first time during its noteworthy existence the famous house of Peter Henderson & Co. have made such an arrangement with a newspaper. The subscriber is left to choose either four rose or four chrysanthemum plants or the Rainbow collection of seeds which is especially choice. The catalogue price of either of these three is \$1.25. One need not take the plants until springtime, as the order that we give on Peter Henderson & Co. is good until June 1st, 1892. You will see at a glance that the subscriber to the monthly edition of Frank Leslie's Weekly, the price of which is \$1.00, also receives \$1.25 worth of flowers or seeds, and the Graphological chart. The above and one year's subscription to the BRECKENRIDGE NEWS for only \$2.00.

A CONSERVATIVE.

Extract from a Speech Made by C. B. Gill to the Walla Walla (Kan.) Alliance.

For self preservation and because it is a duty to ourselves, our families and our country, we must have a voice in this government, and that we may be heard there must be hearty co-operation, unanimity and decision. The greatest danger to our organization, the severest strain upon our co-operation will ever be partisan politics. Our constitution declares this to be a social organization where every member, be he Republican, Democrat or Knight of Labor, will receive the same warm welcome, the same cordial support; our politics is broader than any party; it is founded upon patriotism and good fellowship; we are a co-operation of farmers seeking a fair, honest government which we believe will bring greater prosperity to the farmers and the whole country.

We desire to help with our united strength such laws as will give to each individual the right to the right to enjoy the fruit of his own labor. That our demands may always receive the earnest support of all farmers they must be founded upon justice; they must not be such demands as will give us benefits at the expense of other classes of our people; our politics must be above taking a mean advantage of any class of people or of any section of our country; if other classes and other sections have taken mean advantage of us, that will be no valid excuse for resorting to similar measures.

It is not by appealing to the evil passions, striving to awake feelings of revenge and retaliation, that we can hope to gain the hearty co-operation of all farmers; however attractive certain demands may appear to the farmer at first sight, if those demands are unfair and unjust they will not receive the support of our united strength—such demands will never bring us any lasting success.

Good government is the combining of law and liberty in just such proportions as will best develop the manhood of a nation, as will best advance a people to a higher civilization, as will best aid humanity to a more perfect life. But the wisest statesman may adjust these proportions of law and liberty with the greatest care and most perfect statecraft, and yet they will not combine into a good government; so the skilled chemist may measure out in their exact proportions the two elements, hydrogen and oxygen, and yet they will not combine into water; it requires patriotism to combine law and liberty into good government; it requires electricity to combine hydrogen and oxygen into water. But how much more difficult the task of the statesman; the chemist's elements ever combine in the same constant proportion, while the proportions of law and liberty are ever changing with the ebb and flow of civilization.

The statesman must know the past and forecast the future—he must see clearly and quickly the signs of the times, ever measuring liberty and law in the ever changing measures of our civilization.

Kick the Right Fellow.

In closing an address to the Alliance convention of Kentucky recently, Congressman Montgomery said:

But it is often said that farmers are naturally a complaining people. It is either so dry that nothing will grow or it rains so much that the weeds and grass will destroy the crops. It is too hot or it is too cold. The law member of the legislature is doing no good, although he was elected as a farmer and promised to legislate in the farmer's interest. That the farmers are always kicking at something or somebody.

Well, my friends, I say the farmers and laborers of this country ought to kick. They have good reasons for kicking. I have never made a political speech in my life that I did not urge them to kick. The trouble has been that they have not kicked enough, or rather, perhaps, that they have not kicked with judgment and discretion.

Did it ever occur to you, my friends, that a great many farmers have been kicking the wrong men? You have been kicking the fellow that is in trouble with you. You have been shoving into the ditch and robbed by the protected manufacturers, the trusts and the Wall street gold bugs; and your neighbors—the merchant, the doctor and the lawyer—who live in the same community with you and who must depend on your prosperity for their meat and bread, have been pushed into the same ditch and robbed with you. And too many of you begin to kick these fellows because they are not farmers. I answer, I sometimes think it is because it is easier and more convenient to kick the fellows who are in the ditch with you than to get out and kick the men who did the pushing.

Don't waste your time kicking the people who are in the same condition you are and whose interests are the same, but join hands with all men who make up our agricultural community and suffer from unjust legislative discriminations, and with one united effort drive from power the agents and advocates of the tribute gatherers, trust monopolists and money barons.

Taxation in New York.

Real estate, as all are perhaps aware, is paying nearly nine-tenths of the state tax, and yet nothing has been done to right the wrong that now exists. According to the report of the state comptroller the amount of personal property taxed in the state is gradually decreasing, while he made the further statement that there was \$2,500,000,000 of personal property which escaped taxation.

If this vast amount of personal property were taxed, would it not decrease the amount of tax paid by the real estate owners? answer, yes! And yet the question is asked many times, "Is it true that the farmers are paying an undue proportion of the tax?"

The state comptroller also makes the further statement in his report that the assessed valuation of the property of the people in this state for the purposes of taxation for 1890 was: Personal, \$385,329,131; real, \$3,298,323,931. This, adding the personal that escapes taxation to the amount of personal that is taxed, makes a grand total of \$2,883,329,131. Therefore it is not plain that if all the personal property were taxed it would greatly reduce the tax paid on real estate? The report of the state assessors also corroborates the fact that the amount of personal property within the state equals or exceeds that of the real.

We must not lose sight of the fact that double taxation is also in opposition to our views, and that we are in favor of debt exemption, which would tend to alleviate the grievances that now prevail.

Anybody Can Make Money

But everybody can't save it. The secret of "getting on" in the world lies in economy. There are many ways to economize. One of the surest ways is to buy only what you need, and that at the lowest possible outlay of money.

Clothing is an item we all must have. It is an item, too, in which there is more humbuggery practiced in this city than any town of its size in the Union.

YOU MAKE A BIG MISTAKE

When you leave your hard-earned dollars with those concerns that make a big blow and bluster. You have got to pay for all this expensive advertising, all this prize business, all this music, tinsel and red fire. Some people don't seem to know this.

When you buy "Our Own Make" Clothing you get honest goods at a reasonable price and pay for nothing but the Clothing. Think of this before you make your next purchase.
